Research Summary

Ph.D. candidate in Computer Science at Princeton University, advised by Prof. Ellen D. Zhong. My research develops generative and representation learning methods for scientific inverse problems, with a focus on heterogeneous cryo-EM reconstruction and AI-driven de novo protein design.

Interests: AI agents for scientific discovery; de novo protein design; protein generative models; diffusion and flow matching in 3D structure spaces; cryo-EM heterogeneity; representation learning; 3D vision.

Education

Princeton University Ph.D. Candidate, Computer Science	<i>2023–present</i> Princeton, NJ
Korea University M.S., Computer Science and Engineering	<i>2020–2023</i> Seoul, Korea
Konkuk University B.S., Applied Statistics and Computer Engineering, double major	<i>2014–2020</i> Seoul, Korea

Selected Research Projects

Agentic Inference-Time Scaling for De Novo Protein Design *2025–present*
Princeton University

- Building AI-agent workflows for protein binder and scaffold design that combine LLM-guided search, structural validation, and iterative sequence/structure refinement.
- Developing evaluation pipelines for hard de novo design targets, including diagnostics for structure confidence, interface quality, diversity, and reproducibility.
- Exploring how inference-time search, self-refinement, and targeted experimental routing can improve practical protein design beyond one-shot generative sampling.

Heterogeneous Cryo-EM Reconstruction *2023–present*
Princeton University

- Developing amortized and transformer-based methods for reconstructing continuous conformational heterogeneity from cryo-EM particle images.
- Co-led CryoBench, a benchmark suite for diverse and challenging cryo-EM heterogeneity problems, accepted as a NeurIPS 2024 Spotlight.

Research Experience

Prescient Design, Genentech Contractor	<i>Nov 2025–Mar 2026</i> New York, NY
- Worked on protein representation learning and generative modeling for protein design, with emphasis on modern 3D generative models including diffusion and flow matching. - Studied limitations of voxel- and structure-space generative models and developed design/evaluation workflows for improved generation performance.	
Prescient Design, Genentech Research Intern	<i>Jun 2025–Aug 2025</i> New York, NY
Led a project on understanding and improving modern generative models in 3D spaces, with applications to protein generation and design.	
AI4ALL Instructor	<i>Jul 2024–Aug 2024</i> Princeton, NJ
Instructed high school students in AI and mentored team projects on medical image analysis using deep learning.	
Broad Institute of MIT and Harvard Associate Computational Biologist; advisor: Dr. Hyunghoon Cho	<i>Jan 2023–Aug 2023</i> Cambridge, MA
Led a project on synthesizing privacy-preserving retinal image datasets with diffusion-based generative models.	
Broad Institute of MIT and Harvard Visiting Graduate Student; advisor: Dr. Hyunghoon Cho	<i>Sep 2021–Apr 2022</i> Cambridge, MA
Led GAN and GAN-inversion based retinal image synthesis research for privacy-preserving data generation, resulting in an ECCV 2022 publication.	
Korea University Research Intern; advisor: Prof. Hyunwoo J. Kim	<i>Jan 2020–Aug 2020</i> Seoul, Korea
- Conducted meta-learning research for layer-wise optimization and co-authored an IEEE Access publication. - Designed algorithms, implemented experiments, and contributed to related work, method, and experiment sections.	
MakinaRocks ML Research Engineer Intern	<i>Mar 2019–Aug 2019</i> Seoul, Korea
Conducted anomaly detection research using variational autoencoders and latent-space regularization.	
Korea Institute of Science and Technology ML Research Intern; advisor: Dr. Yong Moo Kwon	<i>Jul 2018–Dec 2018</i> Seoul, Korea

- Worked on an active chatbot project using rule-based NLP and deep learning methods for situation-aware conversation.

Awards and Service

2024–2027	Asan Foundation Biomedical Science Scholarship. Three-year doctoral scholarship.
2023–present	Reviewer. CVPR (2026), ECCV (2026), ICLR (2025, 2026), NeurIPS (2025, 2026), NeurIPS Workshop (2023, 2024), Information Sciences (2024).
Aug 2024	Invited talk. Flatiron Institute, Simons Foundation.
Feb 2024	Invited talk. CMU MetaMobility Lab.
Sep 2019	Dean's List. Department of Applied Statistics, Konkuk University.
Sep 2019	Konkuk University Scholarship. 40% tuition scholarship.
Jul 2016	Certificate of Commendation. Republic of Korea Marine Corps.

Teaching

Fall 2024	Teaching Assistant, COS302: Mathematics for Numerical Computing and Machine Learning, Princeton University.
Spring 2021	Teaching Assistant, COSE361: Artificial Intelligence, Korea University.
Fall 2020	Teaching Assistant, AAA712: AI Security, Korea University.
Fall 2020	Tutorial Teaching Fellow, Deep Learning, Korea University.

Skills

Programming	Python, PyTorch, TensorFlow, Keras, R, C, Git.
Systems	Linux, macOS, Windows, scientific computing workflows.
Research	Generative modeling, diffusion/flow matching, protein design, cryo-EM reconstruction, representation learning, 3D vision.

Additional Experience

I-Corps Program

Received \$35,000 in government support for customer discovery and technology-based startup exploration.

May 2021–Aug 2021

Republic of Korea Marine Corps

Military service, Yeonpyeong Island, South Korea; received commendation for communication and performance during early warning situations.

Mar 2015–Dec 2016
